1 Цель работы

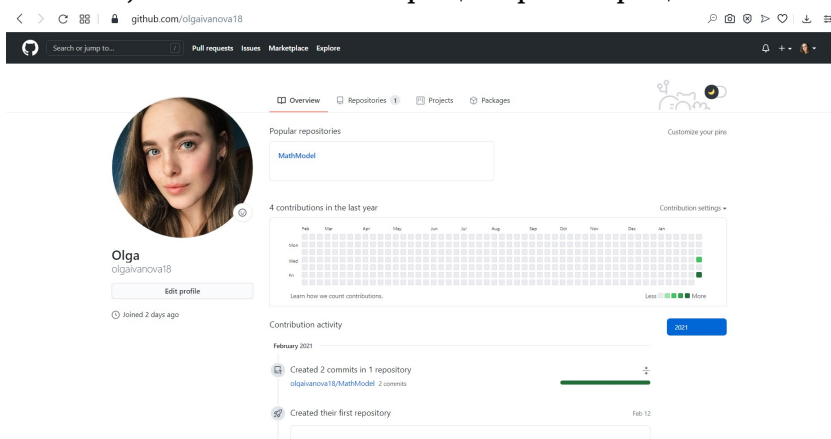

Познакомиться с программой GITHUB, создать репозитой для лабораторных работ.

2 Задание

Необходимо зарегистрироваться в GitHub, создать локальный репозиторий, загрузить его на Git, подготовить отчёт.

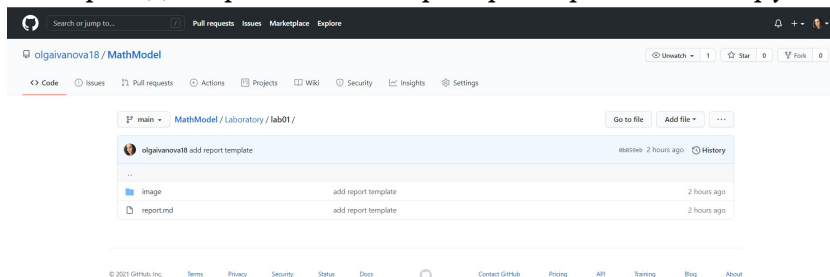

3 Выполнение лабораторной работы

Я уже была зарегистрирована на GitHub, соответственно процесс регистрации

мне повторять не нужно. (рис. ??)

Далее я создала репозиторий для хранения лабораторной работы и загрузила

его на GitHub. (рис. ??)

С помощью команд `pandoc.exe presentation.md -F pandoc-crossref --pdf-engine='lualatex' --number-section -t beamer --slide-level=2 -o presentation.pdf` и `pandoc.exe report.md -F pandoc-crossref --pdf-engine='lualatex' --number-section -o report.pdf` и `pandoc.exe report.md -o report.docx` я конвертировала файлы md в docx и pdf. По окончании работы загрузила мои отчеты в GitHub.

4 Выводы

В ходе выполнения этой лабораторной работы я узнала, каким способом создавать директории в GitHub, выгружать туда свои файлы, а так же научилась работать с файлами формата .md .
